Fourth-year Software Engineering student specializing in mobile app development, quality assurance (QA), and API testing. Experienced in cross-platform testing (Android, iOS, Web) and UI/UX design. Proven ability to collaborate with cross-functional teams to ensure high-quality products and improve overall user experience.

TECHNICAL SKILLS

Programming: Python, C++, C, Java, JavaScript, C#, Swift, HTML, CSS, SQL

Frameworks & Tools: Flask, Node.js, React, Vue.js, Angular, Xcode, Android SDK

Testing & QA: Selenium, Cypress, Postman, JIRA, Appium, Charles Proxy, TestRail

Cloud & DevOps: AWS (Lambda, EC2), Azure, Docker, Jenkins

Design & Modeling: Figma, SolidWorks

Databases: MongoDB, MySQL, Firebase, PostgreSQL

WORK EXPERIENCE

Quality Assurance Specialist, Arcelius Consulting Inc.

June 2024 – October 2024

- Led QA for 20+ Salesforce Marketing Cloud campaigns, improving issue detection and cutting post-release bugs by 95%.
- Automated test cases using Cypress and Selenium, reducing manual regression effort by 40%.
- Delivered detailed QA documentation and defect tracking via JIRA, accelerating resolution rates by 20%.
- Collaborated with cross-functional teams (Product, Engineering, UX) in Agile sprints.

EDUCATION

B.Eng., Major in Software Engineering

April 2026

Ontario Tech University | Oshawa, ON

- Clubs/Societies: Women in Engineering.
- Relevant Coursework: User Experience, Software Quality & Project Management, Data Management Systems, Microprocessors & Computer Architecture, Operating Systems.

PROJECT EXPERIENCE

Vehicle Maintenance Alert System

March 2025

Full-Stack Web App | Python (Flask), Vue.js, SQL, REST APIs

- Designed and deployed a scalable microservices-based backend to deliver predictive maintenance alerts using Python and Flask.
- Integrated RESTful APIs and SQL for dynamic data handling and analytics.
- Applied Agile methods with weekly sprints and code reviews to simulate enterprise-level workflows.

RoamIn Hotel Reservation System

November 2024

React, MongoDB, Node.js | Ontario Tech University

- Developed a cloud-ready full-stack booking platform with 500+ concurrent transactions supported.
- Designed optimized MongoDB schema and React frontend, improving UI responsiveness and load speed by 30%.
- Collaborated using Git and Agile standups to deliver a production-quality demo.

War Card Game App

September 2024

Swift, Xcode, UI/UX Design

- Engineered a Swift-based iOS app featuring turn-based logic and a responsive UI.
- Built AI gameplay logic and performance enhancements to reduce app load time by 30%.
- Prioritized user engagement and design accessibility.
